- Serum presets (.SerumPreset)*

**Please make sure you update Serum 2 to the latest version to ensure compatibility;
Serum 2 is a free upgrade for existing Serum license holders*

3. Usage Tips

- All your new Serum presets have 8 macro controls assigned – these are great for automating, allowing you to subtly or drastically change the character of each sound over time.
- The presets are given provisional sound type identifiers such as 'BA' for bass – whilst this indicates that the preset will sound good in this role within your track, why not try swapping them around e.g. using a bass as a lead, or a pad as a bass?
